**A. M. Todd Botanical Therapeutics Announces Distribution Agreement for CinSulin®**

Logan, UT, November 1, 2007 – A. M. Todd Botanical Therapeutics (AMTBT), a major supplier of botanical extracts and nutritional supplements, announces a distribution agreement with Tang-An Medical Co., Ltd. for the distribution of CinSulin®, the only patented water extract of cinnamon for maintaining healthy blood glucose levels already within normal range. Research suggests that water extract of cinnamon is both more effective and safer than other cinnamon extracts.

CinSulin is the original extract developed by Dr. Nancy Cheng, M.D., Ph.D., founder and president of Tang-An Medical. Dr. Cheng has dedicated her life to limiting the impact of diabetes. “I feel very strongly that our relationship with A. M. Todd Botanical Therapeutics will increase market availability of CinSulin, resulting in more

product choices for individuals interested in maintaining healthy blood glucose levels. AMTBT has a broad reach within the DSHEA, functional food and beverage markets. We are honored to be working with such a well-established leader in the U.S. market,” stated Dr. Cheng.

Bob King, President of AMTBT, remarked, “Dr. Cheng is recognized as an expert in the use of cinnamon for glucose control. We are pleased to be able to offer such an efficacious, patent-protected product to the markets we serve in the U.S.”

Dr. Cheng will be available to discuss the benefits and uses of CinSulin at the A. M. Todd Botanical Therapeutics exhibit booth #13013 at SupplySide West in Las Vegas, Nevada, November 7 and 8, 2007.
